

Today, we learned an Earthquake can happen at any time and even here where we live! We have to be prepared and know what to do in case something happens. We discussed our Earthquake plan for school and practiced the drill. Now we need to do the same at home! Parents, please review your emergency plans for your home with your children. Make sure they know what to do. Practice the drill, fill out the form below and return it to the teacher by

_____.

How to do a drill at home:

1. Put together a family emergency preparedness kit and a special one just for kids. If you already have one, review it and check to see if any food items have expired.
2. Practice as if there was an earthquake happening in the area and have them do the following:
 - A. Drop to the ground.
 - B. Take cover under a sturdy table (NO glass).
 - C. Hold on until the quaking stops.

Student's Name: _____

Student's Teacher: _____

School: _____

How long did the drill take? _____ minutes _____ seconds

What time of day did you do the drill: _____ Day _____ Night

Parent's signature: _____
